SUMMARY

Versatile Software Engineer with hands-on experience in software development, database engineering, system integration, and industrial automation. Proficient in developing desktop applications, web applications, enterprise systems, and real-time monitoring solutions using modern programming technologies. Experienced in Oracle and SQL Server database development, API integration, cloud connectivity, application maintenance, and process automation. Strong understanding of software architecture, business processes, and technology-driven solutions with a passion for continuous learning and innovation.

TECHNICAL SKILLS

- C#, C++, PHP, Python, JavaScript
- Wonderware InTouch, SupracoK, Kepware OPC DA
- Laravel, React.js, REST API
- PLC/DCS Integration, MES Integration
- Oracle PL/SQL, SQL Server, SQL
- Windows Server, Virtual Machines, Cloud Integration

PROFESSIONAL EXPERIENCE

POSCO DX Indonesia, Software Automation Engineer

May 2025 - Present

- Developed and maintained industrial software applications using C#, C++, VB, and scripting technologies.
- Designed machine tracking, process monitoring, and real-time data acquisition systems for manufacturing operations.
- Developed HMI/SCADA solutions using Wonderware InTouch and SMS Group SupracoK, including process visualization, alarms, trends, and scripting.
- Integrated PLC, DCS, HMI, databases, and enterprise applications using Kepware OPC DA communication technologies.
- Developed Oracle PL/SQL solutions including Stored Procedures, Packages, Functions, Triggers, and Scheduled Jobs.
- Managed Oracle and SQL Server databases, supporting system integration, performance optimization, and operational reliability.
- Implemented data integration and automation solutions between manufacturing systems, MES platforms, and cloud environments.
- Participated in AI solution testing and digital transformation initiatives within manufacturing environments.

PT Krakatau Argo Logistics, IT Support & Programmer**Dec 2023 – May 2025**

- Provided technical support for hardware, software, network infrastructure, and business applications.
- Developed and maintained internal web-based systems including Work Order Management, Sales Order, and Document Management applications.
- Designed software solutions to improve operational efficiency and reduce manual administrative activities.
- Implemented logistics information systems supporting shipment tracking, warehouse management, and inventory monitoring.
- Integrated business systems and databases to improve workflow automation and data accuracy.
- Supported application maintenance, troubleshooting, and database administration activities.

Machine Learning Student, Kampus Merdeka x Zenius Education**Feb 2022 – Aug 2022**

- Completed an intensive Machine Learning program focusing on data analysis, predictive modeling, and machine learning implementation.
- Developed a smartphone sales forecasting project for Asian markets using machine learning techniques and data-driven analysis.
- Performed data preprocessing, feature selection, model training, and evaluation to improve prediction accuracy.
- Analyzed large datasets to identify trends, patterns, and business insights supporting forecasting objectives.
- Collaborated with team members to test, validate, and optimize machine learning models.
- Presented project findings and recommendations based on predictive analytics results.

EDUCATION

Banten Jaya University, Bachelor of Computer Science**Sept 2019 – Dec 2024**

System Information Majors With (3,69) GPA

Bachelor of Study Independent by Kampus Merdeka**Aug 2022**

Machine Learning Programs With Zenius Education

ADDITIONAL INFORMATION

LANGUAGE: English, Korea**CERTIFICATION:** Accelerated Machine Learning Program – Zenius Education, Cisco Certification, BNSP Certification, Graphic Design Certification.**All Project On my Github :** <https://github.com/rafliauliy>
